

NeuraViz: A Web Application For Visualizing Artificial Neural Network Structures

A Manuscript

Submitted to

the Department of Computer Science

and the Faculty of the

University of Wisconsin–La Crosse

La Crosse, Wisconsin

by

Bennett Wendorf

in Partial Fulfillment of the

Requirements for the Degree of

Master of Software Engineering

May, 2024

$$P = NP$$

By Bennett Wendorf

We recommend acceptance of this manuscript in partial fulfillment of this candidate's requirements for the degree of Master of Software Engineering in Computer Science. The candidate has completed the oral examination requirement of the capstone project for the degree.

List of Figures

Glossary

P

The general class of questions for which some algorithm can provide an answer in polynomial time.

NP

The class of questions for which an answer can be *verified* in polynomial time.

L^AT_EX

L^AT_EX is a document preparation system.
